

NORMAN BUI

Canadian Citizen | +1 613-983-3217 | normanbui@cmail.carleton.ca | linkedin.com/in/nbui23 | github.com/nbui23

EDUCATION

- Carleton University** | *Bachelor of Computer Science (Honours), 4.0/4.0 (A+) GPA* Expected April 2026
- Awards: Deans' Honour List, President's Scholars, Chalmers Jack Mackenzie, and Henry Marshall Tory Scholarships
 - Relevant Coursework: Data Structures & Algorithms, Discrete Math, Discrete Structures, Operating Systems, OOP, Paradigms, Web Development, Quality Assurance, HCI (UI/UX), Database Management Systems, Statistical Modeling, Linear Algebra, Calculus

EXPERIENCE

- Autodesk** | *Software Engineer Intern* | *Java, TypeScript, GraphQL* Jan 2025 - Present
- Working on cloud-based CAD/CAM development for Autodesk's Fusion platform
- Public Health Agency of Canada** | *Junior Data Scientist* | *Python, LLM, MDM* Sep 2024 - Dec 2024
- Developed LLM-powered workflow for epidemiological literature reviews with Imperial College London and the World Health Organization as part of a MDM system to enable standardized research access for global health initiatives
 - Conducted comprehensive embedding model evaluation using Ollama to validate existing RAG system performance, confirming optimal configuration and establishing baseline metrics for future improvements
 - Researched how to automate academic paper collection using GPT-4o, developing proof-of-concept for scalable PDF retrieval workflow
- Kongsberg Geospatial** | *Software Engineer Intern* | *C++, Qt, Python, GIS* May 2024 - Aug 2024
- Served as sole developer creating demos with TerraLens SDK, resulting in successful solution delivery to various major aviation, defence, and government clients
 - Integrated LiDAR, WMTS, and S-57 data and optimized render pipeline to achieve **consistent 60+ FPS** with real-time object tracking, while implementing system monitoring (GPU, CPU, RAM) and modernizing Qt UI/UX
 - Developed automated airspace classification framework, removing manual processing and standardizing data categorization
 - Automated VFR and terrain data processing workflows, reducing aggregating time by more than **40%**
- Health Canada** | *Data Scientist Intern* | *Python, ML, NLP, ETL* Sep 2023 - Dec 2023
- Developed Python solutions for chemical assessment, leading to improved risk data aggregation and analysis
 - Built random forest classifiers with pandas, NumPy, SciPy, and scikit-learn to accurately predict chemical toxicity
 - Rebuilt organization-wide federated chemical search system using BeautifulSoup4 and lxml, implementing automated fault tolerance and rate limiting that increased query success rate by **20%**
 - Architected scalable web scraping framework and implemented test-driven development practices using unittest framework, restoring chemical data source integration capability **by 113%** and achieving **100% test coverage**
 - Engineered automated knowledge graph pipeline using Neo4j, CoreNLP, and Stanza to extract semantic triples from medical literature, reducing qualitative data processing time and work
- Department of National Defence** | *Junior Software Engineer* | *Python, LLM, RAG* Jun 2023 - Nov 2023
- Built conversational AI system using GPT-3.5 and Flask, implementing RAG architecture to enable intelligent querying across **20+ tax documents**
 - Developed NLP pipeline using NLTK, integrating tokenization, contextual analysis, and NER to enhance text understanding and information extraction accuracy
 - Architected vector search system using FAISS and SQLite3, optimizing embedding storage and retrieval for queries
- NAV CANADA** | *Software Engineer Intern* | *C++, Qt, PowerShell, GIS* May 2023 - Aug 2023
- Developed C++ solutions for various ATC applications, resulting in improved performance and reliability
 - Optimized data management algorithm for internal data tool, resulting in a **60% decrease** in storage utilization and **30% boost** in automated data analysis performance
 - Resolved multiple bugs in ATC software, achieving an overall **improvement of 16%** in frame rate
 - Automated network configurations with PowerShell, reducing manual work and setup time by **more than 95%**
- Correctional Service Canada** | *Junior Software Engineer* | *C#, .NET, Web Development, QA* May 2022 - Apr 2023
- Improved web accessibility using the WET framework to ensure WCAG 2.1 Level AA compliance, enhancing UX for **100+ daily users** in victim services application

PROJECTS

- Obscure Coding Language RAG Systems** | *Python, RAG, LangChain, FAISS, Sentence Transformers* 
- Researched and developed RAG systems to answer obscure programming language queries **@ Bedarra Corporation**
- SocialSaplings** | *HTML/SCSS, JavaScript, Bootstrap, Node.js, Express.js, Firebase (Firestore, Auth)* 
- Led cross-functional team to build a reforestation platform, resulting in **1st place @ KuriusHacks** out of 15 teams
 - Built tree species recommendation algorithm integrating various APIs to analyze user geodata for optimal planting
 - Developed an interactive visualization dashboard using the Google Maps API to display real-time reforestation metrics and global environmental impact data

SKILLS

Languages: C/C++, Python, Java, C#, SQL, HTML/CSS, JavaScript, PHP, Gherkin | English, French, Vietnamese
Frameworks & Databases: Flask, Spring Boot, Express.js, MySQL, SQLite3, PostgreSQL, Firebase, MongoDB, Neo4j, JUnit, Selenium
Libraries: pandas, NumPy, matplotlib, scikit-learn, unittest, spaCy, Sentence Transformers, BS4, lxml, HuggingFace
Development Tools: Git, Node.js, Ubuntu, Qt Creator, Postman, Agile Methodology, SDLC, OOP, TDD, Cucumber
